

BODYBUILDER BLACKOUT

Hi :) Thanks for checking out our game.

This game is intended as a co-op experience where communication is key! One player controls the game while the other has to guide them using this document.

The goal of the controlling player is to navigate a dark house and reach the goal while trying not to break anything while also describing the environment to the advising player.

The goal of the advising player is to communicate with the controlling player, warn them of any breakable objects they might encounter, and help them solve small puzzles.

Both players have to communicate with each other to successfully make it through the game.

For the intended experience it is recommended that the advising player doesn't look at the game screen during gameplay.

To my dear wife,

honey if you are reading this I am currently trying to repair our fusebox to return light to our wonderful home so that you can continue carving your newest statue!

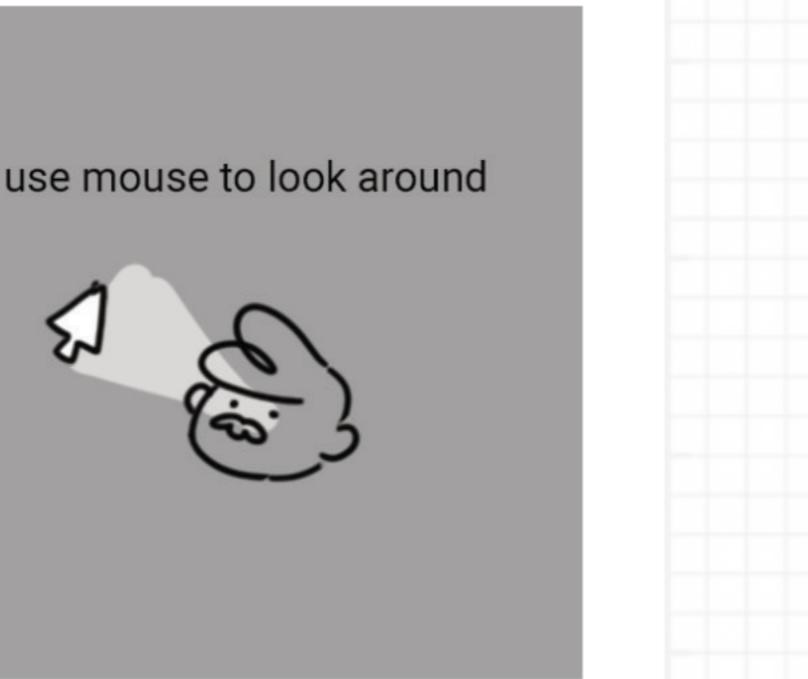

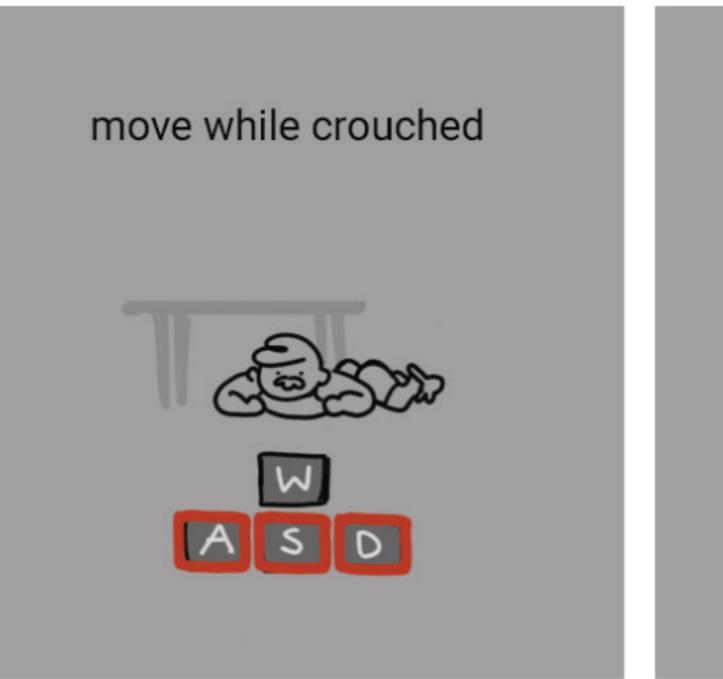

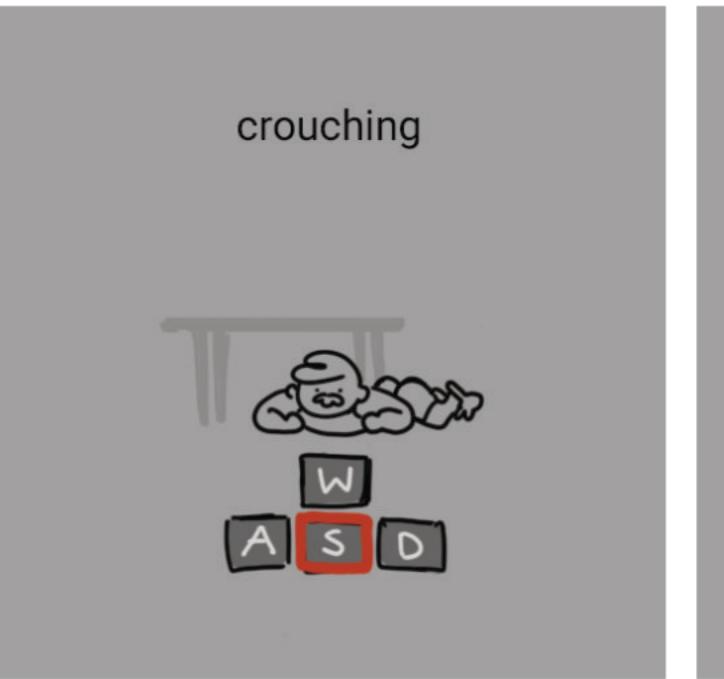

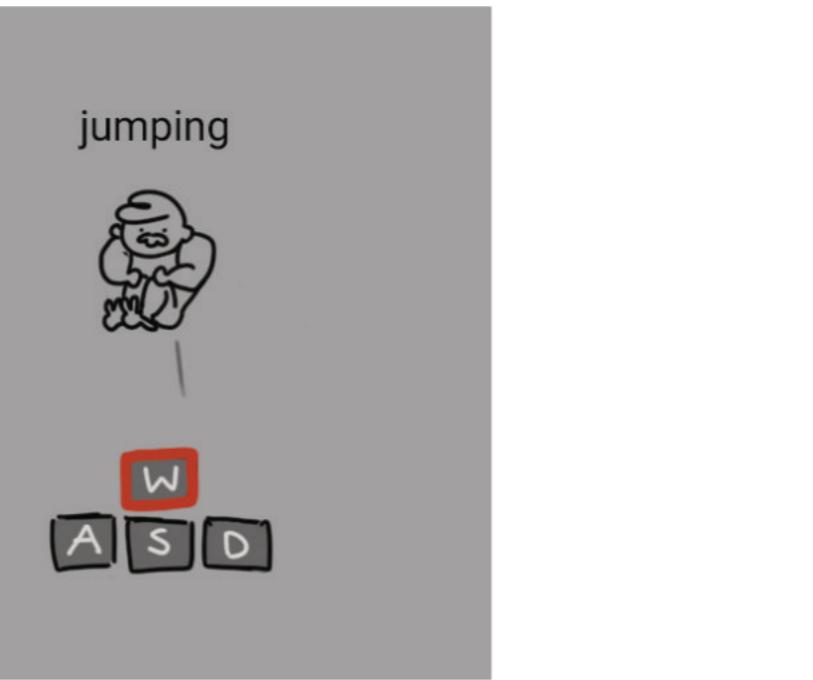

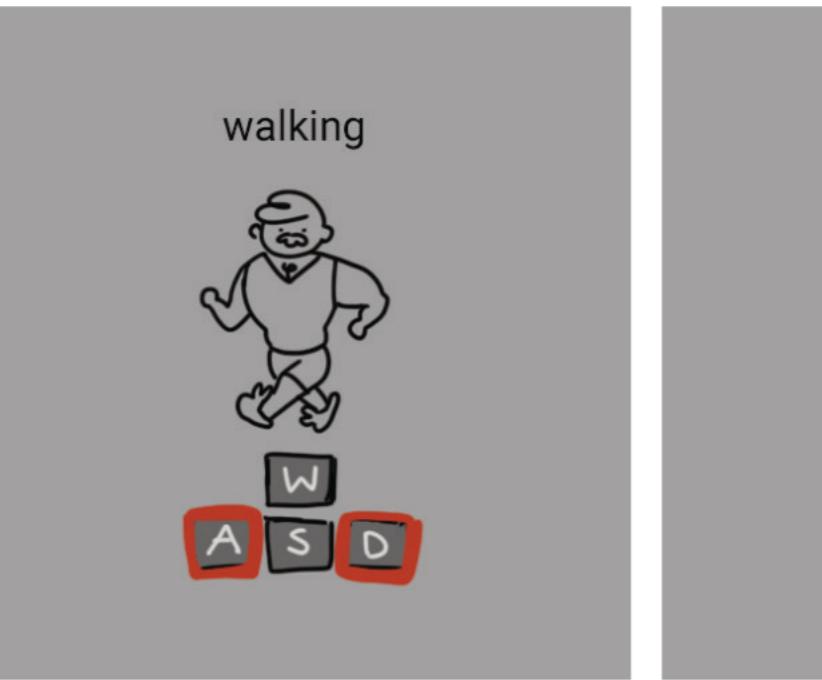

I need you to guide me through the dark so I can reach the cellar.

I made this helpful document because our house is as big as my love for you and I get confused by the constant remodeling we have to do after our weightlifting accidents.

After your dumbbell broke through 2 ceilings (wow!) the carpenters had to completely change the layout of the rooms. You should be able to see the latest map on the following pages.

Here is what I need you to do:

1. Find the map and guide me through the rooms to reach the cellar. Try to warn me of any obstacles or fragile things in my path. I do not wish to destroy our home any further :(
2. The cellar door is locked so our protein powder doesn't get stolen. So we also need to find the correct key. I should have noted the hiding place of the key next to the door I installed!
3. Lastly I need you to help me fix the fusebox. The correct combination of fuses should be noted at the end of the document.

Possible Renovations Layout 1

Blue Key

Green Key

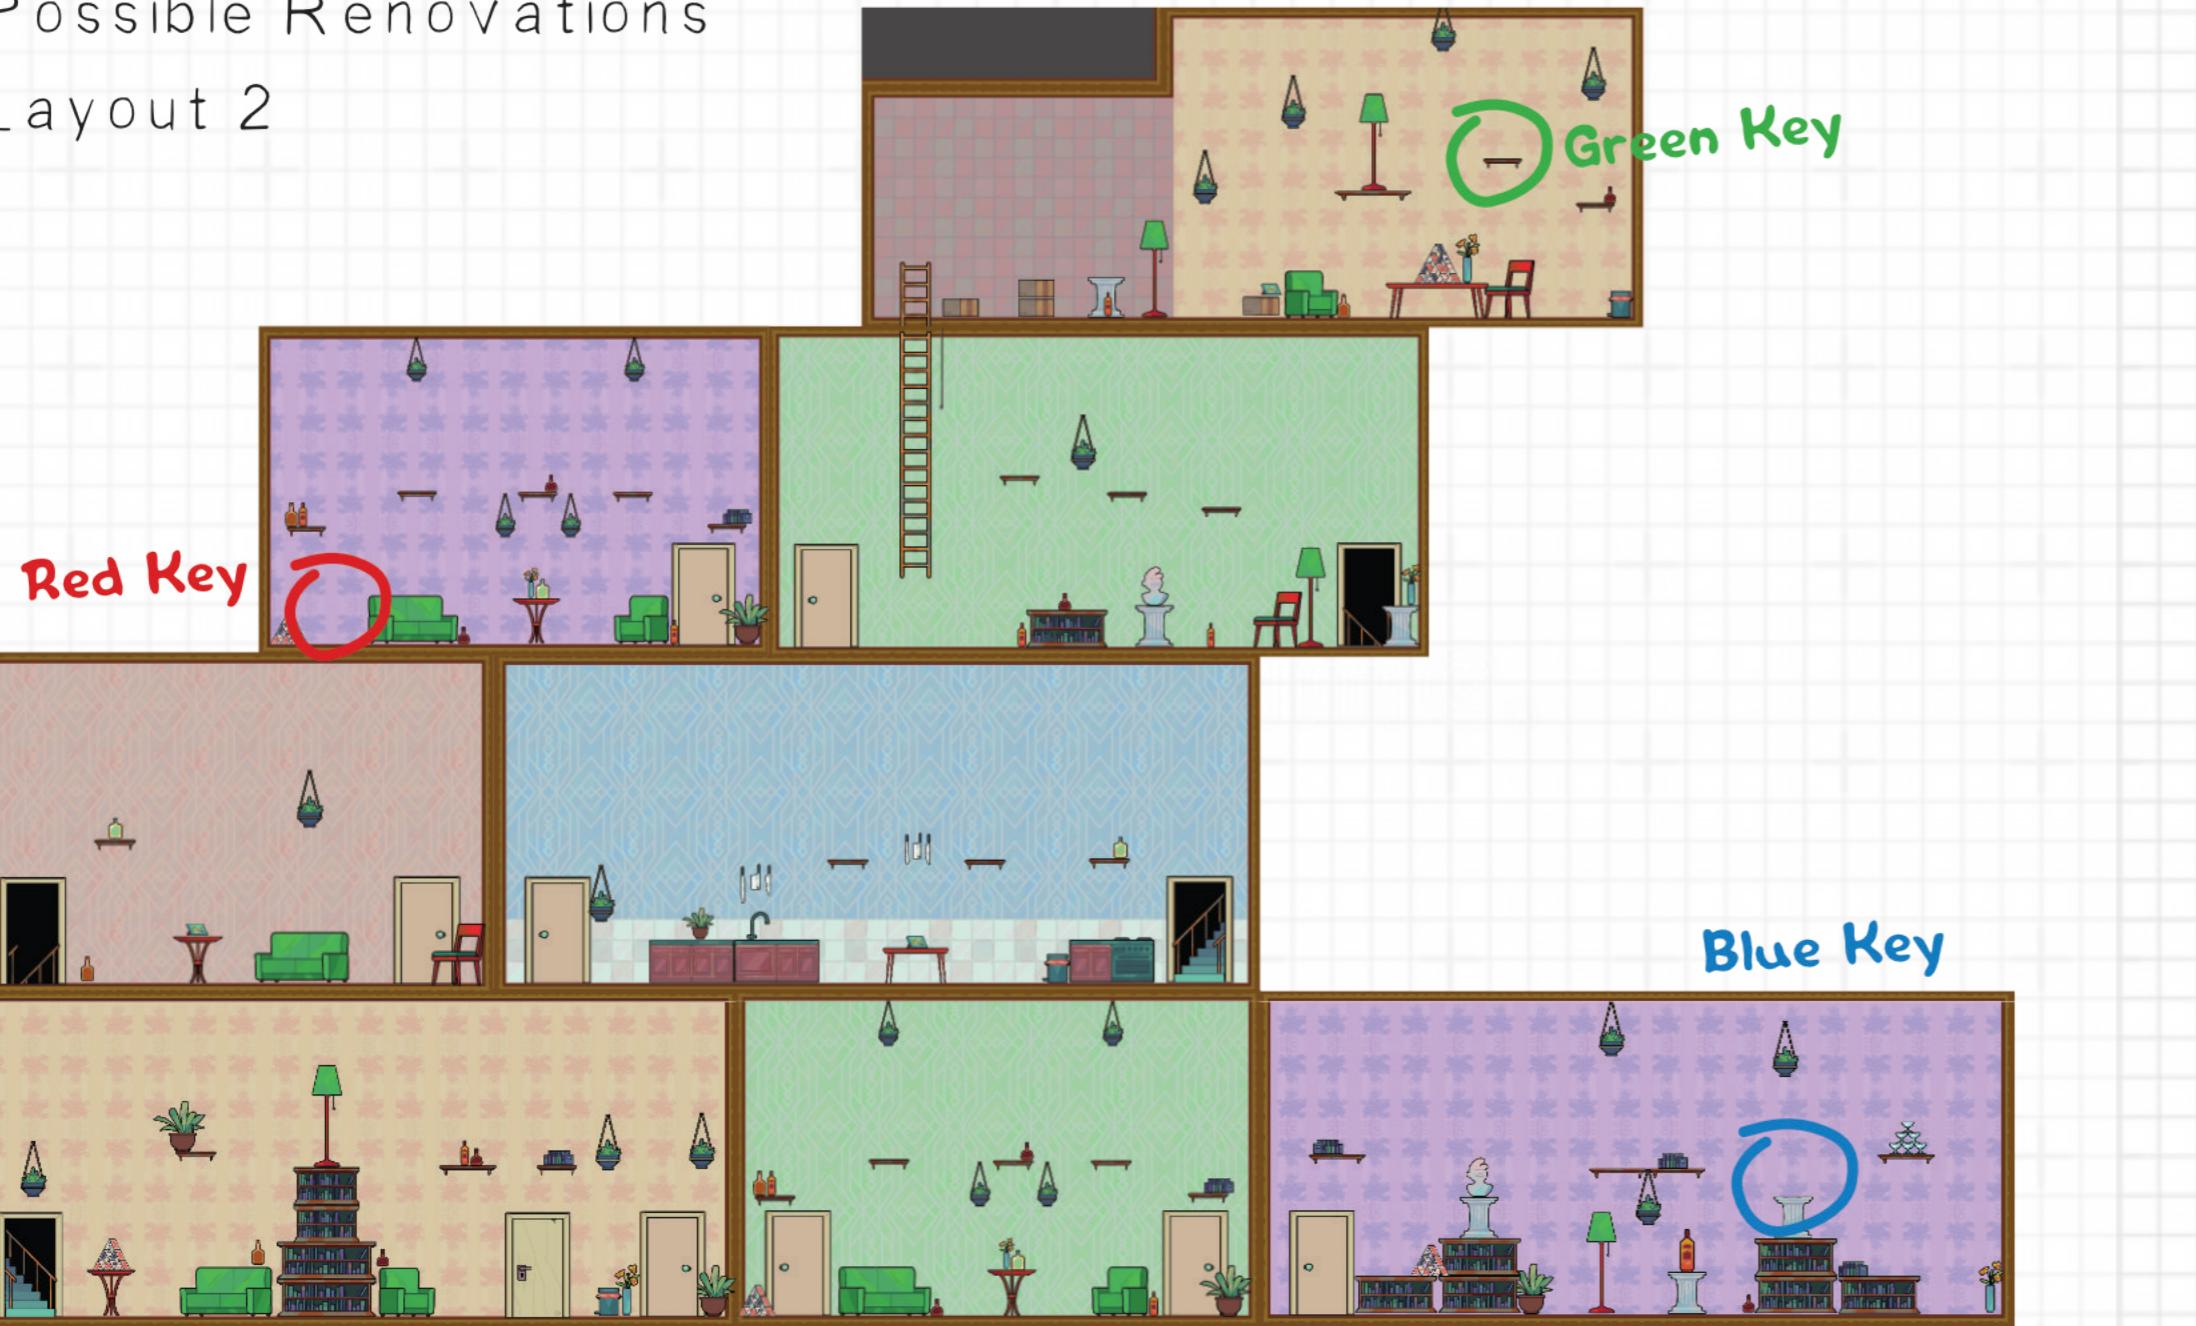

Red Key

To Do:
Mark correct
layout for wife.

Possible Renovations Layout 2

Cellar Door Catalogue

Option 1

This door is made out of the famous prism tree known for its beautiful diamond pattern.

In addition the tasteful winged door handle compliments the pattern perfectly.

In the corner you can find the signature of the famous artist Igor Butterflious.

This door comes with a red key!

To Do:
Tell wife which
door i bought

Option 2

This door will make you remember the ocean waves of your last vacation.

The doorhandle is one of the most secure on the market and will keep your protein powder safe!

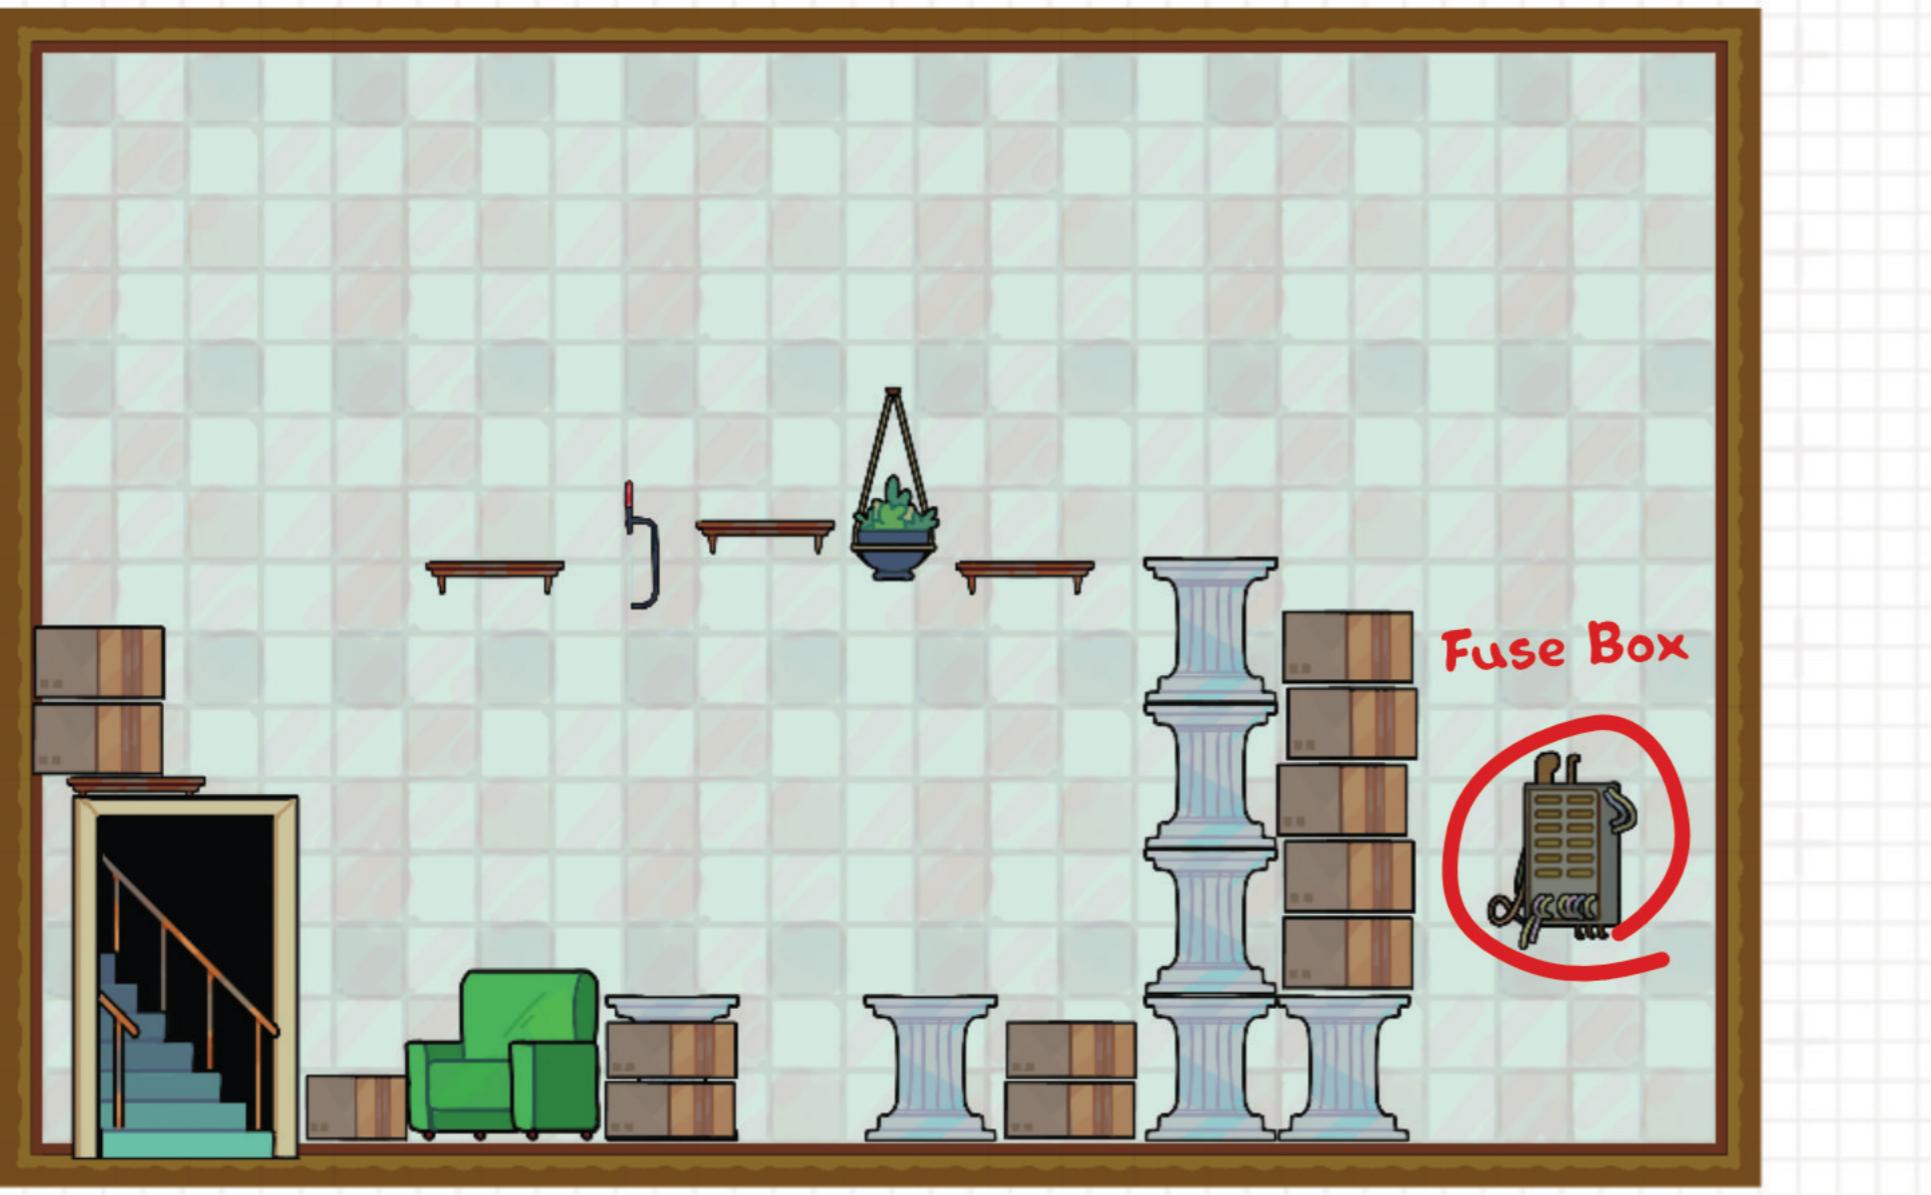

It can only be unlocked with the incredibly durable green key! (made out of uranium)

Option 3

This model is very basic but stands the test of time. It is our longest running series of doors.

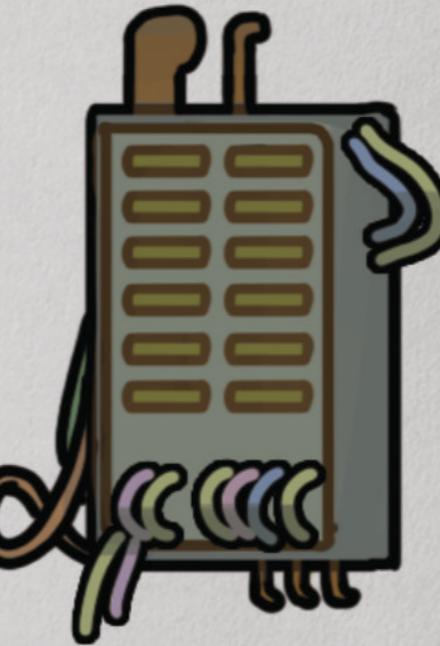

The blue key is stylish and timeless and even though it might look a bit shabby
it will keep your cellar secrets safe.

Fuzinator LUM3400 Manual

Welcome to your new life with the amazing Fuzinator LUM3400 Fusebox! Guaranteed to never Shortcut. Never suffer blackouts again. We will lightup your life (and house hehe)

Reset Instructions

In the extremely unlikely event that the Fuzinator LUM3400 causes a blackout (which would never happen) follow these simple instructions to reset the device.

- Insert the pink fuse below the M1 fuse
- The C3 fuse always has to be placed before the G6 fuse.
- Place the Orange fuse into the last slot.
